1909

AYER'S AMERICAN ALMANAC 1909

FIFTY-SEVENTH YEAR OF PUBLICATION

PUBLISHED BY
DR. J. C. AYER & CO.,
Practical and Analytical Chemists,
LOWELL, MASS., U. S. A.

FORMULAS

AYER'S SARSAPARILLA

Non-alcoholic Revised Formula
Each Fluid Ounce Represents

| | | | |
|-------------------------|-----------|--------------------------|-------------------|
| Sarsaparilla Root . . . | 10 Grains | Senna Leaves . . . | 2 Grains |
| Yellow Dock Root . . . | 8 Grains | Black Cohosh Root . . . | 2 Grains |
| Licorice Root . . . | 8 Grains | Pokeroot . . . | 1 Grain |
| Cinchona Red Bark . . . | 6 Grains | Iodid of Potassium . . . | 4 Grains |
| Buckthorn Bark . . . | 4 Grains | Glycerin, C. P. . . | 3½ Drachms |
| Stillingia Root . . . | 4 Grains | Flavoring . . . | { Oil Sassafras |
| Burdock Root . . . | 3 Grains | | { Oil Wintergreen |

Water—Sufficient to make one fluid ounce.

AYER'S CHERRY PECTORAL

Non-alcoholic Revised Formula
Each Fluid Ounce Represents

| | | | |
|-------------------------|-----------|----------------------|-----------|
| Heroin . . . | 1⁄6 Grain | Bloodroot . . . | 2 Grains |
| Wild Cherry . . . | 6 Grains | Rio Ipecac . . . | 2 Grains |
| Grindelia Robusta . . . | 4 Grains | Citric Acid . . . | 2 Grains |
| White Pine . . . | 4 Grains | Terpin Hydrate . . . | 1 Grain |
| Senega . . . | 4 Grains | Glycerin, C. P. . . | 4 Drachms |

Water—Sufficient to make one fluid ounce.

AYER'S PILLS

Each Pill Contains

| | | | |
|--------------------|-----------|----------------------|-------------|
| Jalap . . . | 1⁄8 Grain | Podophyllin . . . | 1⁄10 Grain |
| Ginger . . . | 1⁄8 Grain | Gamboge . . . | 1⁄20 Grain |
| Aloes . . . | 1⁄4 Grain | Oil Peppermint . . . | 1⁄60 Grain |
| Coccyth Pulp . . . | 1⁄8 Grain | Oil Spearmint . . . | 1⁄100 Grain |

Excipient—Sufficient quantity.

AYER'S MALARIA AND ACUE CURE

Non-alcoholic Revised Formula
Each Fluid Ounce Represents

| | | | |
|----------------------|----------|---|------------|
| Quinia . . . | 8 Grains | Peppermint . . . | 8 Grains |
| Cinnamon . . . | 8 Grains | Orange-peel . . . | 12 Grains |
| Alfalfa Ginger . . . | 8 Grains | Glycerin, C. P. . . | 3½ Drachms |
| Peppermint . . . | 4 Grains | Water—Sufficient to make one fluid ounce. | |

CONSULT YOUR DOCTOR

We strongly urge you to consult your doctor on any and every question pertaining to your health, or to the health of those dependent upon you. We urge this because we believe it is the best thing for you to do. No medicine was ever made that could take the place of the family physician. We recommend here our old standard family preparations because we have perfect confidence in them. But we want you to have confidence in them, as well.

Therefore we say, consult your doctor freely about your case. Show him our formulas and everything we say about them. If he says one of our medicines will help you, then take it. If he suggests anything better, then take that. Do as he says. He knows. Trust him.

ECLIPSES, 1909.—In the year 1909 there will be four eclipses, two of the Sun and two of the Moon.

I. A total eclipse of the Moon, June 3. Visible to South America and Africa, and in part to North America, Europe, and southwestern Asia. Occurring as follows:

| | New York. | Richmond. | Cincinnati. | St. Louis. | Denver. |
|--------------------------------|--------------|--------------|--------------|--------------|--------------|
| | <i>h. m.</i> | <i>h. m.</i> | <i>h. m.</i> | <i>h. m.</i> | <i>h. m.</i> |
| Total eclipse begins | 8 2 A. | 7 48 A. | 7 20 A. | Invis. | Invis. |
| Middle of eclipse | 8 33 A. | 8 13 A. | 7 51 A. | 7 28 A. | Invis. |
| Total eclipse ends | 9 4 A. | 8 50 A. | 8 22 A. | 7 59 A. | Invis. |
| Moon leaves shadow | 10 18 A. | 10 4 A. | 9 36 A. | 9 13 A. | 8 14 A. |

First contact of shadow, 55 degrees from the south point of the Moon's limb toward the east. Magnitude of eclipse = 1.164 of the Moon's diameter.

II. A total eclipse of the Sun, June 17. Visible to North America as far south as a line drawn from San Francisco to the mouth of the Rio Grande River, and the northern and eastern portions of Asia. Occurring as a partial eclipse as follows:

| | <i>Begins.</i> | | <i>Ends.</i> | <i>Digits eclipsed.</i> |
|----------------------|----------------|--------|----------------------|-------------------------|
| New York | 7h. | 3m. A. | Middle after sunset. | 3 |
| Richmond | 6 | 57 A. | Middle after sunset. | 2 |
| Cincinnati | 6 | 30 A. | After sunset. | 4 |
| St. Louis | 6 | 12 A. | After sunset. | 4 |
| Denver | 5 | 21 A. | 6h. 34m. A. | 2 |

III. A total eclipse of the Moon, November 27. Visible to North America and the Atlantic and Pacific Oceans, and in part to South America, the extreme western portions of Europe and Africa, and the eastern portions of Asia and Australia. Occurring as follows:

| | New York. | Richmond. | Cincinnati. | St. Louis. | Denver. |
|--------------------------------|--------------|--------------|--------------|--------------|--------------|
| | <i>h. m.</i> | <i>h. m.</i> | <i>h. m.</i> | <i>h. m.</i> | <i>h. m.</i> |
| Moon enters shadow | 2 15 M. | 2 1 M. | 1 33 M. | 1 10 M. | 0 11 M. |
| Total eclipse begins | 3 18 M. | 3 4 M. | 2 36 M. | 2 13 M. | 1 14 M. |
| Middle of eclipse | 3 59 M. | 3 45 M. | 3 17 M. | 2 54 M. | 1 55 M. |
| Total eclipse ends | 4 40 M. | 4 26 M. | 3 58 M. | 3 35 M. | 2 36 M. |
| Moon leaves shadow | 5 42 M. | 5 28 M. | 5 0 M. | 4 37 M. | 3 38 M. |

First contact of shadow, 58 degrees from the north point of the Moon's limb toward the east. Magnitude of eclipse = 1.372 of the Moon's diameter.

IV. A partial eclipse of the Sun, December 12-13. Visible to the extreme southeastern tip of Australia, the southern portion of New Zealand, and the South Polar regions.

**APPARENT RELATIVE POSITION
OF THE EARTH, THE SUN, THE MOON,
AND THE SIGNS OF THE ZODIAC.**

CHRONOLOGICAL CYCLES.

| | |
|----------------------------|------|
| Dominical Letter | C |
| Epact | 8 |
| Golden Number | 10 |
| Solar Cycle | 14 |
| Roman Indiction | 7 |
| Julian Period | 6822 |

Mercury will be evening star about January 26, May 20, and September 17; and morning star about March 9, July 7, and October 28.

Venus will be morning star till April 28; then evening star the rest of the year.

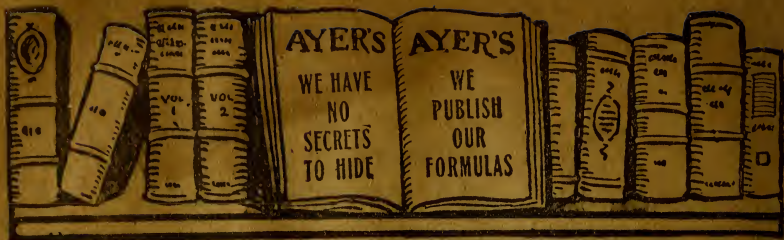

Jupiter will be morning star till February 28; then evening star till September 18; and then morning star again the rest of the year.

STANDARD TIME.

The calculations of this Almanac are given in local time. In places where what is now called standard time has been substituted for local time, our values can be changed to standard time by applying a correction found as follows: For any place *east* of one of the standard meridians, and taking that meridian's time, four minutes should be *subtracted* for every degree of difference of longitude; and for any place *west* of the meridian four minutes for each degree of difference should be *added*.

Note.—In this Almanac the Sun's rising and setting are for the upper limb, corrected for parallax and refraction, in mean time; so are the Moon's.

Middle.

WE ARE AN OPEN BOOK

No Excuse for Ignorance. There is no excuse these days for not knowing what is going on. Our splendid common schools, the multitude of good books, together with magazines and papers, cheap postage, rural free delivery—these make it very easy for us all to become familiar with what is going on in all parts of the world.

Rascals Must Go. This increased intelligence means that the days of humbuggery, of wilful and deliberate cheating, are rapidly passing away and will soon meet their doom. The growing intelligence of all our people will surely stamp out the business of the rascal and the rogue. The day is certainly coming when there will be no room for a medicine which promises impossible things, and whose sole object is to make money for its owner.

Have Always Published Formulas. Dr. James C. Ayer was a man who was far ahead of his day in many things. From the very first he gave the complete formulas of his medicines to the Medical Profession. He believed in doctors, and made his medicines as an aid to their work. Made from physicians' prescriptions, made upon honor, made to cure, made to endure, the House he founded has stood the test of nearly three-quarters of a century.

Formulas Published Everywhere. A number of years ago, believing even at that time that the more the people knew about our medicines the better they would like them, we published our full and complete formulas everywhere. Wherever we advertise—in newspapers, magazines, circulars, and in our Almanac—there we give each and every ingredient of our preparations. We are an open book, to be known and read of all men. We have nothing to conceal; no secrets to hide.

We are Close Students. We are constantly studying the latest and best medical literature in order that our medicines may be kept in strict accord with the most modern medical thought. We are equally thorough in our study of the most recent laboratory discoveries, in order that our medicines may be made the very best that science can possibly produce. This, together with our long experience in the business, enables us to declare in very strong and unmistakable terms that all of our preparations are the very choicest, purest, and best that can possibly be made.

Consult Your Doctor. You certainly have confidence in your family physician. Then let him be the judge. He is a thorough student. He has had experience. He knows about medicines. He knows what they should contain. Then show him the formula of the medicine. Ask him his opinion. Go further than this and ask him if he does not approve of every statement made here about that medicine. If he endorses what we say, then certainly you will be abundantly satisfied to go ahead. Do as he says, at any rate. We are entirely willing to leave the whole subject to him.

Ayer's Sarsaparilla

Entirely Free
from
Alcohol

For the treatment of
Thin Blood, Anemia,
Poverty of the Blood, Weak-
ness, General Debility, Ner-
vousness, Nerve Exhaust-
tion, Nervous Prostration,
Nervous Dyspepsia, Indi-
gestion, Dyspepsia, Skin
Diseases, Etc.

No Alcohol. As announced in Ayer's Almanacs for 1907 and 1908, Ayer's Sarsaparilla is entirely free from alcohol. A family medicine without alcohol must strongly appeal to every one.

Keeps in Any Climate. Ayer's Sarsaparilla keeps in any climate, although entirely free from alcohol. This is due to two reasons: First, because of the great neatness and care with which it is prepared; and second, because of the presence of the glycerin, which prevents fermentation and freezing.

Not a Doctor. Ayer's Sarsaparilla is not a doctor! Neither will it take the place of a doctor! It is a medicine, a regular medicine; made to aid the doctor, not to take his place. It will not cure everything. It will not cure everybody. But we do not hesitate to affirm that thousands of people dragging out a miserable existence might enjoy robust health if they would only use this standard family medicine.

Delicate Children. For children who are pale, thin, languid, without appetite, and who do not seem to prosper, Ayer's Sarsaparilla is especially adapted. Being entirely free from alcohol, it may be given to the children without the slightest fear of awaken-

ing or creating a desire for strong drink. Youth is the time for laying a solid foundation for future health. Hence, do not postpone treatment for these delicate children. Let your family physician ever have a watchful eye over them. Consult him frequently, and follow his advice carefully.

A Spring Medicine. Spring headaches, spring fever, spring languor, spring debility, spring boils, spring nervousness, spring sleeplessness—know anything about these? And do you know that Ayer's Sarsaparilla, because of its great tonic and alterative properties, will bring about a better condition of affairs? It arouses dormant functions, gives force and vigor to the nerves, makes wrong things right, and all without stimulation. Ask your family physician if he endorses these statements. Rely upon his judgment; and remember we are his assistant, not his competitor.

The Nervous System. Delicate nerves connect the brain and spinal cord with all parts of the body. All the vital processes—as breathing, the beat of the heart, digestion, muscular contraction, etc.—are under the control of the nervous system.

Cause of Weak Nerves. One great cause of weak nerves is thin and impure blood. To act properly, the nerves must be well fed, the blood must be pure and rich. Another cause may be traced directly to the digestive organs; while another cause is due to imperfect action of the organs concerned in removing impure substances from the body; as the kidneys, bowels.

Nervous Diseases. Nervousness, neuralgia, nervous weakness, nervous prostration, nervous headaches, nervous dyspepsia, sluggish brain, sleeplessness—all may rightly be called diseases of the nervous system. They cause great suffering, and even lead to most serious results.

The Best Treatment. Ayer's Sarsaparilla will certainly do immense good in these cases of a weakened nervous system. It removes the cause, makes more active all the organs and tissues concerned in removing poisonous substances from the body. It strengthens the digestion, makes the blood richer and redder. The strong alterative properties of this medicine make it change these diseased processes into processes of health.

Go it, boys! It's a great race! And it's a long way to the end, too! Any one of many things may mean victory or defeat. Good health, robust health, is almost absolutely essential if you are to win. Some boys need just a little help, something to give a better appetite, stronger digestion, steadier nerves, stouter muscles; just a little Ayer's Sarsaparilla for a few weeks.

Ask Your Doctor. Diseases of the nervous system so often lead to serious results that you should not trust too much to your own judgment. Consult your doctor frequently. Tell him just how you are getting along under treatment with Ayer's Sarsaparilla.

If he says he has a medicine better adapted to your case, then take his at once. Remember, we are here to give aid in your recovery. That is what your physician is for, as well.

No Stimulation. Persons with weak nerves are often tempted to use alcoholic stimulants. When under the influence of these there is a feeling of comfort and repose that is most gratifying. But the results are often terrible. Leave all such questions to your doctor. Never for one moment think of taking an alcoholic stimulant, or alcohol in any form whatever, without his approval. We are sure that he will tell you that in the great majority of cases an alcoholic stimulant is one of the worst things you could possibly use. Leave this whole question to him.

The strongest Sarsaparilla you can buy. Our illustration shows that one dose will do more for you than four doses of the ordinary kind. And there is no alcohol in it! The strength you obtain from its use abides. There is no reaction. The up grade steadily continues until health is fully restored.

Anemia. Anemia is a disease characterized by great deficiency of the red corpuscles of the blood, and also of those elements of the blood which make its nutritive value. The cheeks are pale, eyes sunken, pulse weak, appetite poor, digestion bad. Ayer's Sarsaparilla acts directly upon the blood-making glands in these cases, more red corpuscles are produced, the blood becomes richer and redder, color comes back to the face, and the general health improves in every way.

Consult your doctor. Delay may be dangerous.

A PUPIL thus defined the word "spine": "A spine is a long, limber bone. Your head sets on one end, and you set on the other."

LITTLE Johnnie, having a couple of bantam hens, tied an ostrich egg near their nest, and above it a card with the words: "Keep your eye on this and do your best."

SHE: What would you do, Henry, if burglars got into the house? He: Do? I suppose I would do just what they told me. I've never had my own way in this house yet.

GRACE: Weren't you very nervous while Jack was proposing? Polly: I should say so! I was afraid he would be interrupted.

Ayer's Sarsaparilla, Complete Formula

Each Fluid Ounce Represents:

| | | | |
|-----------------------------|-----------|------------------------------|-------------------|
| Sarsaparilla Root | 10 Grains | Senna Leaves | 2 Grains |
| Yellow Dock Root | 8 Grains | Black Cohosh Root | 2 Grains |
| Licorice Root | 8 Grains | Pokeroot | 1 Grain |
| Cinchona Red Bark | 6 Grains | Iodid of Potassium | 4 Grains |
| Buckthorn Bark | 4 Grains | Glycerin, C. P. | 3½ Drachms |
| Stillingia Root | 4 Grains | Flavoring | { Oil Sassafras |
| Burdock Root | 3 Grains | | { Oil Wintergreen |

Water—Sufficient to make one fluid ounce.

SHOW THE FORMULA TO YOUR DOCTOR

At the first opportunity, show this formula to your doctor. Ask him if he thoroughly endorses these ingredients. Ask him if the statements here made concerning them are in strict accord with the teachings of modern medicine. We believe we have the full approval of the Medical Profession. Any family medicine should certainly have this approval. A medicine that does not have the approval of the Medical Profession is a medicine that you should not use under any circumstances whatever.

Glycerin. All the glycerin we use is carefully analyzed by our own chemists, and we know beyond a question of doubt that it is absolutely pure, chemically pure, the choicest and most select that can be purchased. Absolutely pure glycerin has high food value, some authorities declaring it is equal to cod-liver oil as a food in such wasting diseases as anemia, consumption, etc. It also has marked preservative properties, completely destroying the germs of fermentation. This makes it strongly indicated in fermentative dyspepsia, or indigestion associated with the formation of gas. In nervous dyspepsia it is also highly valuable.

Chemically pure glycerin is becoming more and more prescribed in low conditions of the nervous system; as nervous exhaustion, nervousness, neuralgia, nervous debility. In Ayer's Sarsaparilla there is not only this nerve food, but there are also other ingredients which act as strong nerve tonics. This makes Ayer's Sarsaparilla both a nerve food and a nerve tonic; certainly an ideal preparation for weakened and debilitated conditions of the nervous system.

Sarsaparilla. An old remedy with a high reputation for the various eruptions and rashes of the skin, rheumatism, general debility, impure blood, thin blood. It has especial action upon the kidneys, thereby aiding nature in removing certain poisonous substances from the system.

Yellow Dock. A very valuable remedy in the treatment of congested and inflamed conditions of the lining membranes of the digestive tract. Especially recommended in diseases of the skin. A valuable remedy in nervous dyspepsia.

Licorice Root. Has well-known soothing and healing properties. Allays irritation.

Cinchona Bark. Long known to the Medical Profession as a tonic and antiseptic of great power. Builds up and invigorates the whole nervous system. Of great value in general debility and during convalescence from exhausting disease. Indicated in all low conditions of the general health. Tones up the stomach, aids digestion. It would be hard to overestimate its usefulness as a general tonic.

Buckthorn Bark. A tonic to the walls of the alimentary canal, thereby tending to produce regular action of the bowels.

Stillingia. The best alterative in the vegetable kingdom. Improves nutrition. Tones up and strengthens all the glands concerned in the making of rich, red blood.

Burdock. Has a high reputation in the treatment of erysipelas, pimples, eczema, eruptions. Increases activity of the kidneys.

Senna. Has slight laxative properties. Also acts as a tonic to all the digestive organs.

Black Cohosh. Has marked influence in imparting strength and vigor to the nervous system. Increases the secretion of all the digestive juices. Acts especially upon the excretory organs, aiding nature in removing impure products from the body. Especially recommended for rheumatism and neuralgia.

Pokeroot. Relieves congested and irritable conditions of mucous membranes. Valuable in the treatment of diseases of the skin.

Iodid of Potassium. Stands above all other remedies as an alterative of great power. Restores, in some way unknown at the present time, normal functions to those organs or tissues which are not naturally performing their full work. Changes diseased conditions into conditions of health. Largely used for skin diseases, chronic rheumatism, thin blood, low conditions of the system, general debility.

LITTLE Ruth wanted a sister. "Let's pray to God to send us one," she said to her mother. Then added: "No; don't you pray, for if we both prayed, we might have twins."

It was an old-fashioned Methodist camp-meeting. "Oh, had I but one more feather in my wing of faith I could fly to heaven!" exclaimed one old lady. Another old woman shouted, "Oh, Lord, stick it in and let her go!"

Mrs. C: This magazine article says that bachelors should be taxed. Mr. C: That's the way! A man can't enjoy anything these days without paying for it.

HIM: They say that kissing a man without a mustache is like eating an egg without salt. Do you believe it? Her: Really, I don't know. I never ate an egg without salt.

"EFFIE," said Margie, who was laboriously spelling words from a first reader, "how can I tell which is a 'd' and which is a 'b'?" "Why," replied Effie, "the 'd' has its tummy on its back."

A MAN dropped his wig in the street, and a boy close behind him picked it up and handed it to him. "Thank you, my boy," said the owner; "you are the first genuine hair restorer I've ever seen."

Mothers. Doctors. Young girls are especially affected with anemia. Proper treatment and proper advice at this time may determine the question of health or disease for years and years to come. The languor, paleness, weakness, listlessness, together with actual suffering, call for prompt treatment. The family physician knows these cases. He knows the danger, too.

You can't blame her, poor girl! She gets up in the morning more tired than when she went to bed. How can she study? She is more sleepy at noon than at night. Pale, weak, languid, listless. She needs a tonic, a genuine tonic—something to make her eat better, sleep better; something to tone up her nerves.

Ask him about giving your daughter Ayer's Sarsaparilla. Be sure to show him the formula. Then he will be

Pimples. Rashes. Eczema. No use wasting time and money trying to cure skin diseases with cosmetics, lotions, face-powders! You must remove the cause. Ayer's Sarsaparilla changes unhealthy action to healthy action. It purifies and enriches the blood. The signs of bad blood gradually disappear, the skin clears up, and the general health

Just the kind of backing a schoolgirl needs! It is better than influence or wealth. It gives ambition, energy, push, strength. Such a girl studies hard during the day, sleeps well at night, has a hearty appetite, digests her food thoroughly, and is ready for the most active work or play. She is the typical American schoolgirl.

greatly improves. Ask your doctor for his opinion of this medicine as an alterative and a tonic.

If ill, and necessary, Consult your Doctor.

able to tell you exactly what you should do.

Rheumatism. We do not claim that Ayer's Sarsaparilla will cure all cases of chronic rheumatism. We simply claim that it has restored to health thousands of persons who have long and severely suffered from this dis-

Clean your house thoroughly. Brooms, brushes, pans, dusters! Give your blood a good housecleaning, too! Ayer's Sarsaparilla. ease. Your physician will tell you that no remedies in the Materia Medica have a higher reputation for the treatment of chronic rheumatism than black cohosh and iodid of potassium, both of which are in Ayer's Sarsaparilla.

It is an Alterative. Ayer's Sarsaparilla is an "alterative." This conveys but little unless the meaning of that word is fairly well understood. It is a difficult word to define, yet one which the Medical Profession fully understands. We say a medicine is an "alterative" when it alters or changes existing conditions. The especial action of an alterative is little understood. We do not know why certain results follow the use of such a remedy, yet these results are very marked, and of great value. Let us illustrate this: Your appetite may be fairly good, your bowels regular, no special trouble with your stomach, skin smooth, and so on. Yet you feel languid, depressed, irritable, without ambition, your food does not taste good, and you have no desire for work. What you need is an alterative, something that will change these conditions, bring about a better

"WHAT do you know of the power of the press?" we ask of the fair damsel. "Why, when Jack Strong hugged me last night three of my stays were broken," she replies, blushing.

TOURIST: Are all these children yours? Peasant Woman: Thank the Lord, no! Only twelve of them.

PAPA: I never told lies when I was a boy. Son: When did you begin, papa?

A YOUNG man once said to Thomas A. Edison, the inventor: "Mr. Edison, don't you believe that genius is inspiration?" "No," replied Edison; "genius is perspiration."

A GIRL sees nothing wrong in kissing the right man.

"PA, why do people always talk about 'Dame Gossip'?" "Because it isn't polite to leave the 'e' off."

state of affairs. Ayer's Sarsaparilla is just such a medicine.

Of Wide Use. With the above thoughts concerning an alterative in mind, you can readily understand how wide is the application of this strong medicine. Ayer's Sarsaparilla is indeed a standard family medicine. Good for every member of the family, from the youngest to the oldest, and covering a wide range of diseases and affections. We would especially mention thin and impure blood, imperfect action of the kidneys and skin, rheumatism, scrofula, general debility, and nervous exhaustion.

To ward off Disease. It is the weak, the debilitated, the depressed, who most quickly yield to disease. They lack resistive power. Disease germs easily conquer them. They fall early victims of epidemics. Whenever the health is below par Ayer's Sarsaparilla will do great good. It corrects enfeebled conditions, gives the body resistive power.

Very Important. Just ask your

fighting them. The forces of the body must be sufficient to overcome them, to successfully resist them. This is what is meant by resistive power. It is right here that Ayer's Sarsaparilla does so much good, in that it aids nature to such a great extent in restoring

robust and vigorous health to those who are debilitated.

In the House. Keep a bottle of Ayer's Sarsaparilla in the house. Then when any member of the family first begins to feel poorly the remedy is close at hand. A few doses

taken early may prevent very serious disease.

You Must Help. Medicine alone will not cure. And what use would it be to take medicine for dyspepsia if you continued to eat the most indigestible of foods? Or why take a medicine to strengthen your nerves if you pay no attention to rest or to hours of sleep? Medicine alone cannot do everything. You must look well to your diet, keep good hours, avoid exposure, and promptly correct any tendency to constipation by the use of Ayer's Pills.

Trust your Doctor. He knows.

doctor the important part this "resistive power" plays in keeping the body in a healthy condition. We are constantly surrounded with germs of disease, and constantly exposed to conditions which tend to debilitate. We may employ every known method to keep these disease germs from entering the body, yet, do the very best we can, there is no way whereby we can possibly prevent inhaling them with nearly every breath. Our hope lies in successfully

Call Your Doctor Early. No matter what the ailment, nor how slight, if things do not soon turn for the better send for your family physician. You may be a splendid nurse, yet you cannot take his place. The best medicine ever made will not answer. We have great confidence in Ayer's Sarsaparilla as a family medicine, but it certainly is no substitute for your family physician. Consult him freely, trust him fully, and always do as he says.

TEACHER: Of what profession is your father? Scholar: Am I obliged to tell you? Teacher: Certainly. Scholar: He's the bearded lady in a show.

MISS KOY: It's really very kind of you, Mr. Crabbe, to give me your seat Mr. Crabbe: Not at all. We men are getting tired of being accused of never giving up our seats except to pretty girls.

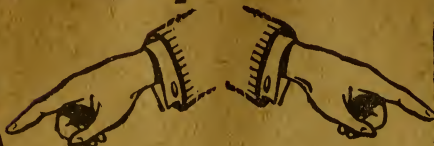

CUPID employs a lot of chaperons in his match factory.

"You say you conceal nothing from your wife?" "Absolutely nothing." "And why do you not?" "It is evident that you do not know my wife."

FOND MOTHER: And was my little boy smart at school today? Little Boy (sadly): My teacher didn't say I was, mama, but he made me smart before I left.

DOCTOR: You must go to a "rest-cure." It will only cost you \$1000. Patient: But I can send my wife to Europe for less.

AYER'S Cherry Pectoral

For the treatment of

| | |
|------------|----------------|
| Coughs | Asthma |
| Colds | Whooping-cough |
| Croup | Influenza |
| La Grippe | Pneumonia |
| Bronchitis | Consumption |

ENTIRELY FREE FROM ALCOHOL

A Doctor's Medicine. Ayer's Cherry Pectoral is a regular medicine, a strong medicine, a doctor's medicine. It is made for the treatment of the various diseases and affections of the throat and lungs. It does not take the place of the family physician. No medicine ever made can do this.

No Secrets. The Medical Profession has had the complete formula ever since this medicine was first placed upon the market, nearly seventy years ago. Of late years we have published the full and complete formula in all our advertising that goes to all parts of the world. We believe that the more you know about this medicine, the better you will like it. Hence, we have no secrets to conceal; we tell you everything.

Highly Approved. The Medical Profession has very highly approved this standard cough medicine. We are very grateful to physicians for the generous way they have prescribed this remedy, and for the highly commendatory letters they have written

us concerning it. We trust you will not hesitate one moment to ask your doctor about it. In this way you can find out for yourself just how much confidence you can place in it. Ask him if he endorses this remedy for the diseases for which it is here recommended. Keep in close touch with your doctor, and follow his directions very carefully at all times.

Elegantly Made. With skilled chemists, expensively equipped laboratories, long experience, and a firm determination to use only the choicest and best of each material, we know positively that Ayer's Cherry Pectoral is a product as finely finished as can possibly be produced, even during these modern days of advanced science. We know that, from the first selection of the ingredients to the very last process of bottling, each and every step is most carefully inspected and most thoroughly performed. In a word, Ayer's Cherry Pectoral is a medicine you can safely trust, a medicine you can talk to your doctor about.

LITTLE Willie, tired of play,
Pushed sister in the well one day.
Said mother, as she drew the water,
"Tis difficult to raise a daughter."

INSTRUCTOR IN SOCIOLOGY: What two
men in the last century have done most to
relieve the troubles of mankind? '09 (ab-
sent-mindedly). Tom and Jerry.

HE: I'll do my very best to make you a
good mate, darling. She: And I shall do
my very best to make you a good captain,
dear.

NOAH: What's all that noise among the
animals? Shem: The camel has got his
back up because the rhinoceros thinks he is
an automobile and keeps tooting his horn.

AYER'S CHERRY PECTORAL

COMPLETE FORMULA

Each Fluid Ounce Represents:

| | | | |
|-----------------------------|---------------------|--------------------------|-----------|
| Heroin | $\frac{1}{2}$ Grain | Bloodroot | 2 Grains |
| Wild Cherry | 6 Grains | Rio Ipecac | 2 Grains |
| Grindelia Robusta | 4 Grains | Citric Acid | 2 Grains |
| White Pine | 4 Grains | Terpin Hydrate | 1 Grain |
| Senega | 4 Grains | Glycerin, C.P. | 4 Drachms |

Water — Sufficient to make one fluid ounce.

The following description of each ingredient in Ayer's Cherry Pectoral is based upon the most recent medical text-books, together with the experience of some of the best physicians in active practise:

Wild Cherry Bark. Especially useful to control tickling in the throat and irritable coughs. Quiets the cough of bronchitis. Allays feverish conditions due to congestion and inflammation in the respiratory tract. In high repute for the treatment of chronic throat and bronchial troubles.

Grindelia Robusta. Has great power to overcome spasmodic or oppressed breathing, as in whooping-cough, pneumonia, acute bronchitis. Especially indicated when there is a sore or raw feeling in the chest. Will often give prompt relief in asthma, and will frequently effect a permanent cure.

White Pine. Promotes the healing process. Quiets and soothes. Indicated in acute coughs and colds, acute bronchitis, la grippe.

Senega. Has a direct influence upon the mucous membrane lining the bronchial tubes. Indicated especially in the treatment of chronic catarrhal inflammations; as chronic pneumonia, chronic bronchitis, chronic laryngitis.

Bloodroot. A soothing and quieting remedy to mucous membranes. Very valuable to quiet coughs in consumption. Frequently prescribed in asthma and whooping-cough. Most valuable when cough is attended with burning or smarting.

Rio Ipecac. Indicated in all inflamed and irritable conditions of the throat, larynx, bronchial tubes, and lungs. Restores the voice when it is rough from too frequent or too hard usage. No better remedy for hoarseness, hard colds, coughs, bronchitis.

Citric Acid. Prepared from lemon juice. Used here simply as an aid in holding the various drugs in permanent solution.

Terpin Hydrate. Prescribed in chronic inflammations of the bronchial tubes. Recommended for hay fever and asthma. Has a high reputation as a valuable remedy for winter coughs.

Heroin. Controls tickling in the throat, quiets spasmodic coughing, allays irritation. A valuable remedy for all inflammations of the whole breathing apparatus.

Glycerin. One of the best-known remedies in the treatment of throat and lung affections, because of its marked soothing and healing properties. Exerts a direct effect upon the membranes of the throat and larynx. Especially useful in sore throat, hoarseness, tickling in the throat.

DO NOT NEGLECT EARLY TREATMENT

Any affection of the breathing apparatus, no matter how slight, must always be regarded as more or less serious. The diseases of the throat, bronchial tubes, and lungs make a most formidable list. The terrible ravages of pneumonia and consumption are known to all. Acute colds, inflammations, tickling coughs, are sufficient to make little breaks in the lining membrane of the respiratory tract, thereby opening the way for future trouble. We do not have the slightest desire to frighten any one. Yet it remains true that if people would only be more anxious about their colds and coughs when they first appear, an immense amount of suffering and thousands of lives would be saved.

Ask your doctor if we exaggerate. Ask if every word we here state is not absolutely true. Ask him if one could well overestimate the danger of neglecting colds. Consult your doctor frequently if you have any trouble with your throat or chest. You cannot afford to make a mistake of this kind.

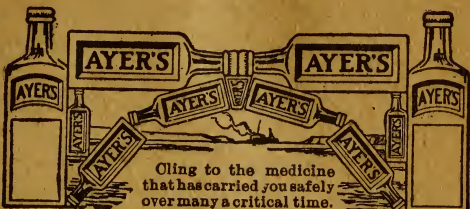

Next to a good doctor is a good medicine. We furnish the medicine.

Coughs and Colds. For acute coughs and colds, and for the hard coughs which are so frequent during the late fall, winter, and early spring, Ayer's Cherry Pectoral is a remedy of the highest value. It should not only be taken while the acute attack is on, but should be continued in diminished

attack is a severe one, we recommend that you consult your physician at once.

Whooping-cough. Asthma. While Ayer's Cherry Pectoral will greatly relieve these diseases and will sometimes effect a permanent cure, yet, generally speaking, all persons suffering

Not an old bridge! Not a weak, broken, condemned bridge! But a bridge that is founded upon modern scientific principles. One kept in fine repair. One tested and tried by the best

experts. That's the kind of a bridge! Trust it. Trust it when but little is at stake. Trust it when an emergency is at hand. Trust it when everything depends upon immediate results.

dozes until the membranes are healed and all signs of inflammation have disappeared. In this way the weakened tissues will be strengthened and the danger of future attacks greatly lessened.

Do not Neglect these Early Cases. Do not wait for bronchitis or pneumonia. Treat your cold promptly and vigorously at the very beginning, no matter how slight it may be.

Bronchitis. This disease is generally known as "a hard cold on the chest." There is a feeling of rawness or burning beneath the breast-bone, and the hard coughing is generally associated with much pain. The person should remain indoors, eat light foods, and take Ayer's Cherry Pectoral strictly according to directions. Full and thorough treatment of these cases is especially important, as the disease is likely to hang on for a long time or even pass into the chronic form. If the disease should fail to yield as promptly as you think it should, then call your family physician without further question, and tell him exactly what you have done. Indeed, if you have any reason to believe that the

from them should be under the constant care of the family physician.

Influenza. La Grippe. Ayer's Cherry Pectoral relieves the pain in the back and the aching bones, subdues the fever, quiets the oppressed breathing, and controls the hard cough. Many cases of la grippe, especially when epidemic, are very serious and require the careful attention of a physician from the very start.

A wrap is a splendid prevention even if you are only going from the door to the carriage. People are so careless about these things. Strange, isn't it? Just a little precaution, and so much sickness would be prevented. It does not pay to run any risk with the health. A pair of rubbers, an overcoat, a wrap, and a bottle of Ayer's Cherry Pectoral; keep them on hand.

Pneumonia. Pneumonia generally begins with a hard chill, followed by high fever, difficult breathing, pain in the lungs, and more or less general prostration. Whenever these symp-

toms appear, you should call a physician at once. Pneumonia is such a serious disease that delay of a few hours may be of the greatest moment. If for any reason your physician cannot reach you promptly, give Ayer's Cherry Pectoral according to directions. But be sure to tell your physician exactly what you have done as soon as he arrives. In this way you will make no mistake.

Singing is such a splendid exercise! It strengthens the throat, expands the chest, brings more oxygen to the blood, improves the general health. But we can't all sing! Sometimes this is because the voice is husky, due perhaps to a little congestion of the vocal cords, or perhaps to overuse of the voice; here's where Ayer's Cherry Pectoral comes in.

Pleurisy. The principal symptom of this disease is a sharp and severe pain in the chest whenever a long breath is taken. Place a mustard plaster over the painful part, taking care that it does not blister. Begin at once with Ayer's Cherry Pectoral and follow directions carefully. If relief is not prompt, then send for your physician, and tell him exactly what you have been doing. Carefully follow his advice at all times.

Consumption. Modern treatment of this disease calls for little medicine. The great treatment consists in fresh air both night and day, an outdoor life if possible, together with the best kind of food. Do not think for one moment of treating yourself. Consumption is certainly a curable disease. Taken early, the majority of cases recover. Even old cases recover under this new treatment. We believe Ayer's Cherry Pectoral is the best medicine you can take for your cough and as

an aid toward restoring the inflamed tissues to health. But ask your doctor about taking it.

Weak Throat and Lungs. Many persons know they have weak throat and lungs. They know they take cold easily. They know they have a sensitive throat. They know they have inherited a tendency to lung troubles. Yet how indifferent they often seem to these facts! They hardly get over one cold before they have another. And yet they let things drift along, month after month and year after year, regardless of consequences. We know we would be doing immense good if we could only convince all such persons of the importance of early and thorough treatment. At any rate, read again what we have said concerning the ingredients of Ayer's Cherry Pectoral. You must then see for yourself how this

Many a happy home today may truly be said to be founded upon Ayer's Cherry Pectoral. Ask the grandmother. This is the way she puts it—"Saved their lives when they were little."

medicine will control the inflammation, strengthen the weakened tissues, and promote the healing process. Your own physician may have told you these same things. If not, ask him about them. Even if you do not have trouble today you will then be in a position to act most intelligently when trouble comes. Ask him if this is not good advice. Stop this irritation in your throat; master the tendency to cough; get rid of your husky voice.

We publish our Formulas. We invite inspection, by you and your doctor.

MERCHANT: Yes, we are in need of a janitor. Where were you employed last? Applicant: In a bank, sir. Merchant: Did you clean it out? Applicant: No, sir. The cashier did that.

"WHICH am de greater feat, to steal a baff tub from a house er to steal a stove?" "To steal a stove, of co'se. It might be weaks befo' dey'd miss de baff tub."

IF you have anything to say to a mule, say it to his face.

SHE: When you asked me to be your wife you deceived me. He: In what way, Martha? She: You told me you were well off. He: Well, I may have said it, Martha, but I didn't know then how well off I was.

"WHAT's the matter?" asks the policeman. "M' wife ish sho disagreeable she hash removed the keyhole."

SINGLETON: I suppose your wife has a lot of will power. Wedderly: Yes; but she has a lot more won't power.

Talk with Your Doctor. So important is this subject that we urge every one who has a delicate throat or weak lungs to consult his doctor at once, not waiting until the hard cold or severe cough is at hand. Ask him what medicine you need, what hygienic measures to pursue, what foods to eat, what clothing to wear. Then follow his advice very carefully.

Stop Coughing. Coughing rasps and tears. Stop it! Coughing prepares the throat and lungs for more trouble. Stop it! There is nothing so bad for a cough as coughing. Stop it! Ayer's Cherry Pectoral is a medicine for coughs. Use it!

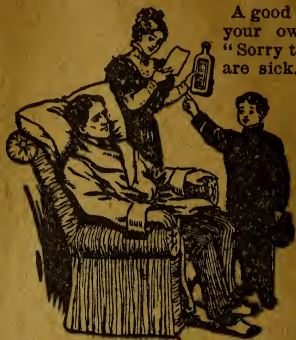

Always the Best. Ayer's Cherry Pectoral was the first medicine that Dr. James C. Ayer made. When it was first placed upon the market, over sixty-five years ago, it was the very best remedy for coughs and colds. Today, it is better than ever. We present it to you as the latest, the most complete, the most scientific, and the most satisfactory throat and lung remedy you can possibly buy.

Great sport! We've been there! Know all about it! Nothing like it! Good exercise coming down, good exercise going up! But when it thaws, things change! First it's wet feet, then sore throat, inflamed tonsils, fever, a hard cold. But you are all right, my boy; your mother has some Ayer's Cherry Pectoral on the medicine-shelf, and she knows when to use it, too.

Aid the Medicine. You cannot expect any medicine to do its best work if you are indifferent to your general health. Keep your bowels in good condition. If you do not have at least one good free movement daily, then use Ayer's Pills. Regulate your diet carefully. See that your digestion is good. Do not needlessly expose yourself.

Keep It on Hand. Always have Ayer's Cherry Pectoral in the house. Then you have the needed help when danger appears. A dose at bedtime given to the child who comes home

A good letter from your own doctor: "Sorry to hear you are sick. The best medicine you can take for your hard cold is a bottle of Ayer's Cherry Pectoral, which I send by this special messenger."

from school with wet feet, or after exposure to a severe storm, may save long and serious illness. The early cough, the little cold, the slight tickling in the throat—these are the danger signals of approaching trouble. Be prepared for emergencies. Have this old, reliable cough medicine in the house all the time. Rely upon it.

Shut in! Too bad! No sport today! Coughed too hard last night! The next time you come in with wet feet have your mother give you a hot foot-bath, a dose of Ayer's Cherry Pectoral, and put you to bed. The chances are you will be all right the next day.

Doctors Know Best. We have never said we knew more about your case than your doctor. We are here to aid him, not to compete with him. Ayer's Cherry Pectoral is no substitute for your family physician. We believe in doctors. And we believe in Ayer's Cherry Pectoral also. But the latter is no substitute for the former. Run no risks. Consult your doctor freely.

We believe in Doctors. We believe they believe in us.

Seventh Month.

JULY, 1909.

31 Days.

"Now you have consented to be mine," said the young man, "I suppose I must ask your father." "Don't think about it. Ask mother."

"HERE, Willie," cried the boy's father, "you mustn't behave in that way! Everybody will be calling you a little glutton! Do you know what that is?" "I suppose," replied Willie, "it's a big glutton's little boy."

A WESTERN bookseller telegraphed to Chicago for a copy of "Seekers After God," by Canon Farrar. He received this reply: "No seekers after God in Chicago or New York. Try Philadelphia."

FATHER: What an unearthly hour that young fellow stops every night, Doris. What does your mother say about it? Daughter: She says men haven't altered a bit since she was young, daddy.

DOES NOT COLOR THE HAIR

AYER'S HAIR VIGOR

**Checks Falling Hair
Destroys Dandruff**

**Makes Hair Grow
An Elegant Dressing**

Sulphur. The leading specialists on diseases of the hair and scalp, both in this country and abroad, now agree that the most valuable remedy known for the treatment of the affections of the hair and scalp is sulphur. When rubbed well into the scalp it promptly destroys the germs which cause falling hair, and also the germs that produce dandruff. When these germs are destroyed the cause of the trouble disappears. For the various rashes and eruptions of the scalp, as eczema, tetter, acne, pustules, pimples, etc., sulphur has no rival in the *Materia Medica*.

Glycerin. Recognized in medical literature as having positive and distinct food value. It greatly aids nature in producing an abundant and luxuriant growth of hair. A well-known soothing and healing agent of high value. Allays itching; destroys germ life; removes dandruff; checks falling hair. Useful in all rashes and eruptions of the scalp. When rubbed well into the scalp it acts as a food to the hair-bulbs, causing them to produce a better and heavier growth of hair. Imparts a richness and softness to the hair, and prevents the hair from splitting at the ends.

Quinin. A stimulant to the hair-bulbs, arousing them to full, healthy action. A powerful tonic and antiseptic. Makes the hair grow thicker, longer, and more abundant.

Sodium Chlorid. Quiets inflammation or irritation of the scalp. Greatly promotes the healing process.

Capsicum. A mild stimulant, increasing the activity of the hair-bulbs. It arouses into full activity all the glands of the scalp, increasing the secretion of the oil-glands, thereby preventing the hair and scalp from becoming too dry. A powerful agent to check falling hair, and to promote the growth of the hair.

Sage. Stimulates and tones up all the tissues and glands of the scalp. A domestic remedy of great merit, especially useful for falling of the hair.

Alcohol. Used in small quantity as a mild local stimulant, arousing the dormant glands of the scalp. It is also a valuable antiseptic, thereby tending to keep the scalp clean and healthy.

Water. A solvent for some of the ingredients, and a medium for the proper combination of all the ingredients.

Perfume. A combination of the choicest and purest oils of lavender, lemon, and neroli.

We most positively assure you that not one of these ingredients can do harm to your hair or scalp. We are very anxious to fully satisfy you on this point. Therefore, we urge strongly that you show this formula to your physician and ask him what he thinks of it.

MISTRESS: What made you angry with the doctor and tell him not to come any more? Bridget: Becas' he said he thought he would send me to a warmer climate, and I'm on ter him.

EPH: What were de mattah wif Salan' dat druggist? Rufus: Why, she wanted some complexion-powder, an' he gib her powdered charcoal.

"A SHEPHERD is a man who minds sheep, isn't he, father?" "Yes, my son." "Then I expect a coward is a man who minds cows."

IRATE PARENT: Here! What is all this noise? Bobby: Please, papa, we are playing trains, and I am the locomotive. Irate Parent: You are the locomotive, eh? Well, I think I'll switch you.

Greatly Valued. These days the hair is more and more appreciated, not only because it is a most desirable adornment, but also because of the protection it affords to the head. Therefore, the proper care and preservation of the hair are being studied more and more by medical men.

It's rush, rush, rush! One mad, wild rush to get to the front! Too busy to

know your coat is covered with dandruff? Too busy to know your hair is falling out? Too busy to grab a bottle of Ayer's Hair Vigor?

Cause of Disease. This study has extended so far that in the best scientific laboratories, both in this country and abroad, most exhaustive investigations have been made to ascertain the cause of such diseases as dandruff and falling hair. Within a comparatively short time positive results have been obtained from these experiments, and from this work we are able to derive most practical and most valuable information.

The Falling-hair Germ. It is now generally recognized by scientific men who have made this work a special study that falling hair is due to a germ, which we may call the "falling-hair germ." These germs attack the hair-bulbs, and thereby bring about such changes that the vitality of the hair is so affected that gradually the hair becomes lifeless and falls out. With prompt and proper treatment these germs may be destroyed. But if the treatment be neglected the damage

done to the hair-bulbs may be so great that no amount of treatment can possibly do good.

Does not Stain or Color the Hair

The Dandruff Germ. It has also been positively proved that dandruff is due to a germ, which we may well call the "dandruff germ." This germ is not the same as that which causes falling hair. It affects the surface of the scalp rather than down deep in the scalp tissue where the hair-bulbs are situated. After these dandruff germs have existed on the scalp for a long time, they produce such diseased conditions that the deeper tissues of the scalp become affected. Hence, it is well recognized by medical men that "dandruff is the forerunner of baldness." Prompt and vigorous treatment is necessary if this disease is to be entirely destroyed.

Destroy the Germs. Of course, the first thing to do in the case of falling hair or of dandruff is to destroy the germs producing the disease. Ayer's Hair Vigor will certainly do this. Shake the bottle thoroughly, and rub the Vigor well into the scalp in order that the sulphur especially may be brought into direct contact with every living germ. It will thoroughly destroy these germs, and, acting together with other ingredients of the Hair Vigor, will bring about a better condition of things at once.

Both Are Diseases. But you must keep in mind that both falling hair and dandruff are diseases due to germs, regular disease germs. To bring about a healthy condition requires the most systematic and energetic treatment. Partial treatment, neglected treatment, a little treatment now and then, can do but little good. You must act promptly and earnestly, be determined to be cured.

A NEW YORK firm recently hung the following sign at the entrance of a large building: "Wanted: Sixty girls to sew buttons on the sixth floor."

MRS. C: I always weigh my words before speaking. Mr. C: Well, my dear, no one can accuse you of giving short weight.

MOTHER: Whatever are you doing to poor dolly, child? Child: I'm going to put her to bed, mummy. I've taken off her hair, but I can't get her teeth out.

"WHAT do you want put on this sign?" asked the painter of the farmer. "Oh, something short and to the point. Make it, 'Summer Boarders Taken In.'"

WOMAN is a thing of beauty and an expense forever.

A GIRAFFE who was painted dark brown And who lived in an African town

Said, "My neck is a peach;
Any food within reach
Can be tasted five times going down."

Your Doctor Knows. Show the formula here given to your doctor. Tell him how strongly we put the case. Show him exactly what we have written, then follow his advice, no matter what it is. We are perfectly willing to abide by his decision. Are you?

A Little Story in Four Chapters.
 Chap. I, Dandruff! Chap. II, Hair Going!
 Chap. III, Hair Going! Chap. IV, Hair Gone!

you more promise than any other preparation you could possibly use.

No Help. But in cases of long-standing baldness, where for years and years the scalp has been bald, thin, shiny, there is no use trying. The hair-bulbs are dead. There is no medicine ever

Baldness Cured? Yes! Ayer's Hair Vigor will make hair grow on a bald head. But not always! If the baldness is of short duration, or due to some acute or particular trouble, Ayer's Hair Vigor will very generally cause a new

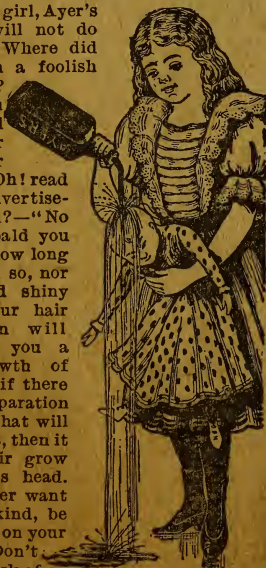

made that could bring them to life.

Dry. Thin. Rough. If your hair is short, thin, rough, splits at the ends, looks dry and lifeless, you will be greatly pleased with what Ayer's Hair Vigor will do for you. It is a hair

Does not Stain the Hair

growth of hair to appear. It may not always succeed, even then, but the prospect is so strong that a thorough

No, my little girl, Ayer's Hair Vigor will not do everything! Where did you get such a foolish notion as that? Who told you that you could make hair grow on your doll's head? Oh! read it in some advertisement, did you?—"No matter how bald you may be, nor how long you have been so, nor how thin and shiny your scalp, our hair preparation will always give you a splendid growth of hair." Well, if there is any hair preparation in the world that will always do this, then it will make hair grow on your doll's head. But if you ever want to try that kind, be sure to put it on your doll's head! Don't ever run the risk of putting it on your own head!

tonic in every sense of the word. It tones up and invigorates the nerves of the scalp, increases the circulation of blood through the scalp tissues, and arouses into new life all the glands and tissues concerned in producing rich, soft, and luxuriant hair.

Unruly Hair. Perhaps you would be well satisfied with your hair if it were not so unruly! That is, it will not stay where you put it! To be sure, Ayer's Hair Vigor is not a hair-oil, does not paste down the hair, yet it certainly enables you to keep your hair well under control.

Aids Growth. Ayer's Hair Vigor is a great aid to nature in promoting the growth of the hair. It supplies nourishment to the hair-bulbs, stimulating and invigorating them to a more natural activity. Glycerin, when absolutely pure, chemically pure, and properly combined with other ingredients, is a most important element in this part of the work. Our own chemists carefully analyze all the glycerin we use, in order that only the very best quality may enter into our prepara-

trial should be made. Being a scientific preparation, right up to date in every way, we believe it holds out to

Does not Stain the Hair

tions. Therefore we say, Ayer's Hair Vigor feeds, nourishes, builds up, strengthens the hair-bulbs.

A Splendid Dressing. Ayer's Hair Vigor is a splendid hair-dressing for women. It imparts richness and smoothness to the hair, yet does not prevent curling or waving.

It is an equally desirable hair-dressing for men. It is cooling and refreshing to the head, keeps the hair and scalp in a perfectly healthy condition, while its perfume is so delicate that it soon disappears after being applied.

Prevents Gray Hair. Ayer's Hair Vigor will not prevent the hair from naturally turning gray or white because of advancing years. But when there is a tendency to premature grayness it will correct such weakened conditions, and thereby prevent these early changes.

Constitutional Treatment. Sometimes the hair falls out because of great weakness of the nervous system. Sometimes also it is due to serious disease, such as typhoid fever, scarlet fever, etc. If you are in poor health, we strongly recommend that you take Ayer's Sarsaparilla for its constitutional effect, at the same time using Ayer's Hair Vigor for its local effect. It will indeed be a rare case of falling hair that will not yield to this combined treatment.

Does not Change Color. Ayer's Hair Vigor may be used by those having gray hair, white hair, or blond hair, without the slightest fear that the color will be changed in any way. You have only to show the formula to your physician in order to be further assured on this point.

Cannot Injure. Do not have any fear that Ayer's Hair Vigor may injure your hair or scalp. We have al-

ready given you the formula, and you have only to show this to your physician for positive assurance on this point. Let him decide the question. Ask him if such a preparation could bring about any undesirable effect on the hair or scalp. Also ask him if this combination does not strongly commend itself to him as most valuable for a hair preparation.

*Ever Sing
This Song?*

VERSE I.

Ayer's Hair Vigor
Stops falling hair.

VERSE II.

Ayer's Hair Vigor
Destroys dandruff.

VERSE III.

Ayer's Hair Vigor
Makes hair grow.

VERSE IV.]

Ayer's Hair Vigor,
A splendid dressing.

VERSE V.

Ayer's Hair Vigor
Does not color the hair.

A Beautiful Ornament. We are sure you will like our beautiful bottle. It is the finest and best flint glass that can be made, and the color is a beautiful peacock-blue. It has a practical and most unique patent shaker. We believe you will agree with us that it is a decided ornament to any dressing-table.

Your Hair is Worth It. Going to neglect your hair until it leaves you? Going to neglect dandruff until you are bald? Afraid to use hair preparations? Don't know exactly what to do? Then why not consult your doctor? Doctors are well posted, these days, on hair and scalp diseases. So why hesitate? You certainly should have confidence in your family physician. Consult him early about your hair and scalp. Isn't your hair worth it?

AYER'S PILLS

A Vegetable Liver Pill

For the treatment of

**Constipation
Biliousness
Nausea**

**Indigestion
Heartburn
Jaundice**

The STANDARD FAMILY LAXATIVE

Made for the treatment of constipation, indigestion, heartburn, loss of appetite, sick-headache, bilious headache, throbbing headache, biliousness, bilious diarrhea, nausea, jaundice, hemorrhoids, piles, pimples, and various affections of the nervous system when dependent upon constipation or inactivity of the liver.

COMPLETE FORMULA

| | | | |
|--------------------------|---------------------|--------------------------|-----------------------|
| Jalap | $\frac{1}{8}$ Grain | Podophyllin | $\frac{1}{10}$ Grain |
| Ginger | $\frac{1}{8}$ Grain | Gamboge | $\frac{1}{80}$ Grain |
| Aloes | $\frac{1}{4}$ Grain | Oil Peppermint | $\frac{1}{80}$ Grain |
| Colocynth Pulp | $\frac{1}{8}$ Grain | Oil Spearmint | $\frac{1}{100}$ Grain |

Excipient—Sufficient quantity.

Jalap. A stimulant to glandular activity. Increases the secretion from the glands of the intestines, making the contents of the intestines more liquid, and thereby aiding in the relief of constipation.

Ginger. A tonic to the stomach. Antispasmodic. Improves the appetite; increases the flow of the gastric juices; relieves the distress from gases in the stomach and intestines. Used here largely to counteract any griping from the action of the other ingredients.

Aloes. A strong tonic to the digestive organs. Increases the secretion of all the digestive juices. Acts especially upon the large intestine, stimulating the walls to contract, thereby producing natural movements of the bowels.

Colocynth. Acts on the liver and digestive organs. Improves the appetite. Gives strength and tone to the digestive organs. Has a direct effect upon the liver.

Podophyllin. Acts directly upon the liver. Stands at the head of all known remedies for increasing the flow of bile. For habitual constipation and for sluggishness of the liver, it is more frequently prescribed than any other drug. Takes the place formerly occupied by calomel.

Gamboge. Stimulates glands and intestinal muscles. Produces increased secretion of the intestinal glands, and causes contraction of the muscles in the walls of the large intestine.

Oils Peppermint and Spearmint. Used to overcome any griping of the laxative drugs; also to relieve pain, and to act as gentle stimulants to digestion.

Study the Formula. A study of the formula of Ayer's Pills will show to any one familiar with Materia Medica that Ayer's Pills are preeminently liver pills. Show this formula to your doctor, with this one thought in mind. Ask him, "Would a pill made from this formula be a good liver pill?" Then if he says, "Yes," and if he says you need a good liver pill, ask him why Ayer's Pills are not just the pills for you to take. We believe they are the best liver pills ever made. We do not believe it possible to make a better liver pill. Yet we have such confidence in these pills, and such confidence in the judgment of the Medical Profession, that we are willing and anxious to leave the whole subject to your family physician.

TEACHER: Willie, why don't you keep your hair combed? Willie: 'Cause I ain't got no comb. Teacher: Why don't you ask your mother to buy you one? Willie: 'Cause then I'd have to keep my hair combed.

"ONE fool at a time," called out a speaker at a political meeting. "Go on, boss," was the instant response.

THE man who has two children
Can always guess the news.

If it's not a hat for Birdie,
Then Willie needs some shoes.

INQUISITIVE: I suppose you miss your husband very much? Widow: Indeed I do. Do you know, when my corns bother me I haven't a friend to turn to who will lend me a razor.

"All pills are so disagreeable!"
Oh no, my friend, not all! There
are exceptions. Ayer's Pills, for
instance. These pills take the "dis" right
away and leave only the "agreeable."

No Laxative Necessary. When nature is able to fully carry out her laws, no artificial laxative is necessary. In the body nature has provided a laxative—the bile. At least three pints of this laxative are secreted by a healthy liver each day. When secreted in this normal amount, its laxative properties are sufficient to cause daily movements of the bowels. But when nature fails to produce this amount of bile, constipation results.

Why Use Laxatives? Perhaps you ask: Why are laxatives necessary? Why not let nature have her own way? If the bowels move

but once every two or three days, what of it? Let us study this a moment.

Body is Poisoned. The alimentary canal is one of the great avenues for removing poisonous materials from the body. If these useless, waste, and poisonous materials are unduly retained within the system, harm must certainly follow. You can readily see how such a course would produce impure blood, rashes, headaches, nervous affections, indigestion, etc. Indeed, persons suffering from constipation are in just the condition to be constantly poisoning themselves.

Poisons must be Removed. These poisons, if too long retained, will affect every organ and tissue. They must be removed as nature intended if sickness is to be prevented and good health retained. There is no question about this whatever. Ask your own

doctor about it and find out for yourself. Ask him if there is any rule of health more important than that pertaining to the action of the bowels.

Daily Movements. How frequently does nature intend that the bowels should move? Of course this varies within a small range, according to the habits of the individual. But it may be put down as a rule, from which there can be hardly even a slight variation with safety, that with adults there should be one good, free, natural movement of the bowels each day.

When Nature Fails. When nature fails to bring this about, something must be promptly done to stimulate the secretion of nature's laxative; something must be done to increase the flow of bile. Salts will not do this; laxative mineral waters will not do it. They may make the bowels move, but

they fail to correct the cause of the trouble; they fail to arouse the sluggish liver.

**A good doctor is
money in your pocket**

Liver Pills. Ayer's Pills are liver pills. They act directly upon the liver. They cause the secretion of more bile. They change a sluggish liver to an active liver. They bring about a natural condition of things. They relieve constipation according to nature's laws. They give permanent relief.

Women Suffer Greatly. Constipation is often a direct cause of the most distressing and most painful affections from which women suffer. Distention of the lower bowel presses upon the pelvic organs, interfering with the free circulation of blood through these parts, promoting congestion and inflammation. To women suffering in this way we strongly recommend Ayer's Pills for producing regular and natural movements of the bowels, with no unpleasant effects whatever.

WILLIE put his stockings on
Wrong side out, and thought it fun.
Mother didn't like his whim,
So she turned the hose on him.

"WHAT has become of the poor blind
man who used to be on this corner?"
"Oh, he wanted to see a ball game this
afternoon, so I took his place."

"CAN you look me in the face and deny
that you married me for my money?"
"Nope; I might deny it, but I can't look
you in the face and deny it."

THE MAID: How dare you hug me, sir?
The Man: Well, er—er—you said you
needed something more around you.

"You know that familiarity leads to con-
tempt." "Out our way it leads to a slap
in the jaw."

It's funny, when you catch your wife
snoring, how she pretends to have a bad
cold all the next day.

EVE: I haven't a thing to wear. Adam:
You are not supposed to wear anything.

We furnish the Medicine, not the doctor.

Treat Early. If the bowels have not moved during the day, take one pill that very night. Do not allow another day to go by without a movement of the bowels. Hence, we urge that a box of Ayer's Pills be always kept in the house. The investment of money is so small, and the possible good so great, that you should certainly have these pills at hand in order to correct the first evidence of departure from health.

Stimulate Glands. Ayer's Pills act as a direct stimulant to certain glands in the alimentary canal which secrete a liquid. When this secretion is increased, the contents of the intestines become more liquid, thereby tending to relieve constipation. This is nature's way of dealing with these problems.

Digestive Glands. Other glands in the stomach and intestines are concerned directly in the secretion of juices which digest the various foods. Ayer's Pills act as a direct stimulant and a positive tonic to these glands. The flow of the digestive juices is increased, bringing great relief to such diseases as indigestion, dyspepsia, flatulence, etc.

Ask Your Doctor. A brief conversation with your doctor along the lines indicated here will serve to further impress you with the value of these pills for the purposes for which they are recommended.

Trust Him. He Knows. Let your own doctor be the judge in these matters. We manufacture the pills, the best pills that can be made. We give directions how these pills should be used. But it is your doctor who must decide any and every question pertaining to the use of these pills. Ask him also if we have overestimated the importance of treating constipation. Leave

the whole subject to him. The more you learn about Ayer's Pills, the more you put them to the test, the greater confidence you will have in them.

Headaches. Dull headaches, congested headaches, dizzy headaches, sick-headaches, bilious headaches, dyspepsia headaches—all point directly to some wrong action of the liver and bowels. To arouse the sluggish liver, to increase the flow of bile, and to produce natural movements of the bowels—this is the proper treatment. It is simply impossible for you to have a clear head, clear brain, and steady nerves, if your liver is inactive and your bowels constipated. We do not hesitate to declare that the great majority of headaches are due to constipated bowels, caused by a sluggish liver.

Prompt Relief.

Q. "When may I know that I need a laxative?"

Ans. "When you do not have at least one good free movement of the bowels each day."

Common sense, just ordinary common sense, would make one declare

that the best treatment and the only treatment for these headaches is to stir up the sluggish liver and relieve the constipation. And we are confident that the advice here given is the very best to bring about this result.

Laxative Doses. Laxative doses of Ayer's Pills are, as a rule, better than cathartic doses, for it is much better to gently arouse the liver than to cause it to overwork. Generally speaking, one of Ayer's Pills each night is sufficient to cause a good movement the day following.

Keep in the House. Keep a box of Ayer's Pills in the house all the time. Then when night comes, if you have not had a good, free movement of the bowels during the day, take one of these pills, just one. A little attention to these matters may save much illness.

Twelfth Month.

DECEMBER, 1909.

31 Days.

"I suppose," he ventured, "that you would never speak to me again if I were to kiss you?" "Oh, George!" she exclaimed. "Why don't you get over the habit of always looking at the worst side of things?"

A LITTLE GIRL'S PRAYER: Dear God, be awfully careful of yourself, for if we should lose you we have nobody but the President, and papa does not like the way he acts.

AUNT: Now, Tom, you must be a good boy. You have a nice new brother. Aren't you glad? Tom: Oh, it's always the way! Just as soon as I am getting on in the world competition begins.

THEY had been discussing the pronunciation of "oleomargarine," and finally agreed to leave it to the waiter, but he hedged. "Sure," said he, "I have to pronounce it butter, or lose my job."

AYER'S

Malaria and Ague Cure

ENTIRELY FREE FROM ALCOHOL

Each Fluid Ounce Represents:

| | | | |
|--------------------------|----------|---|------------|
| Quinia | 8 Grains | Peppermint | 8 Grains |
| Cinnamon | 8 Grains | Orange-peel | 12 Grains |
| Jamaica Ginger | 8 Grains | Glycerin, C. P. | 3½ Drachms |
| Cloves | 4 Grains | Water—Sufficient to make one fluid ounce. | |

Consult your doctor freely about using Ayer's Malaria and Ague Cure. Take with you the formula here given full and complete. With this formula before him your doctor will know precisely how to advise you. If he says this medicine is all right, then take it. If he has anything better, then take his. Get the best there is. This is our advice.

The Best Remedy. Ayer's Malaria and Ague Cure is one of the oldest medicines made by the J. C. Ayer Company. But this medicine has been constantly improved as the years have gone by, until now it represents the very latest and best remedy for ague and all forms of malarial poisoning.

Cause of Malaria. The cause of malaria is now known to be due to the malarial germ. These germs are found in the red blood-cells of all persons suffering from malaria. They must be completely destroyed before recovery can take place.

Action of Medicine. Ayer's Malaria and Ague Cure thoroughly destroys all the malarial germs in the blood. This being the case, there can be no question whatever but that it is the best medicine one can possibly take for ague, malaria, and all forms of malarial poisoning. It quickly and thoroughly destroys the malarial germs. When the germs are destroyed the cause of the disease is at an end, and recovery is speedy and complete.

Acute and Chronic. For acute "fever and ague," the kind that begins with a hard chill which is followed by high fever and profuse sweating, this medicine will give the most prompt

relief. A second chill need not occur, if directions are carefully followed. If you are suffering from any of the forms of chronic malarial poisoning, you will find this medicine equally satisfactory.

A Preventive. If you are obliged to live in a malarial country, it would be wise for you to take small doses of the Malaria and Ague Cure as a preventive. One or two doses each day would be sufficient for this purpose.

Headache. Neuralgia. Persons living in a malarial country, or having recently visited such a district, often have a dull, heavy headache which closely resembles a regular attack of bilious headache or sick-headache. The attacks come on with great regularity at a certain hour each day, or every other day, or third day, as the case may be. Perhaps the pain takes the form of neuralgia, and there is the most intense suffering for days at a time. Or the malarial poisoning may show itself by general depression of the whole nervous system, giving rise to nervousness, nervous dyspepsia, nervous prostration, sleeplessness, etc. All of these conditions are promptly and permanently relieved by using this old and thoroughly established medicine.

NO ALCOHOL

Until within a few years the use of alcohol in pharmacy was thought to be absolutely essential. To extract the medicinal properties from roots, barks, and leaves necessitated the employment of this powerful drug. Its use in the finished product was also thought to be necessary in order to prevent fermentation and freezing.

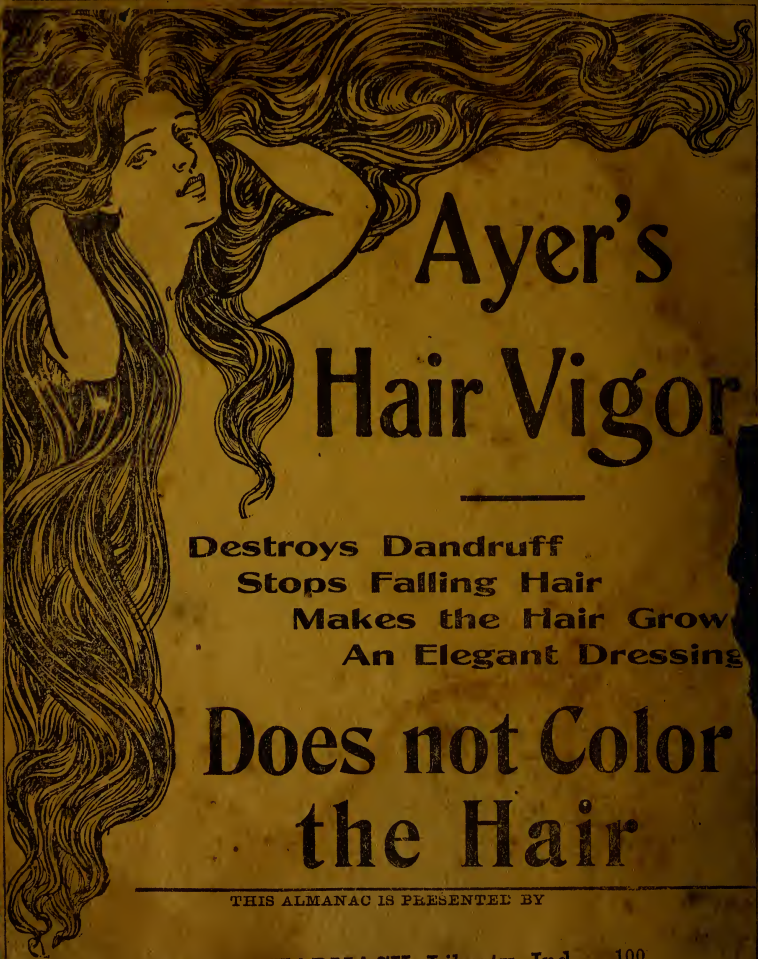

A few years ago we began a series of most exhaustive experiments to determine whether a change could be made so that no alcohol need be present in our family medicines. The results of these experiments were first announced in Ayer's Almanac for 1907. Time has proved that this work was well founded. Without the slightest doubt, in the vast majority of cases, a non-alcoholic medicine is immeasurably superior in every way to a medicine containing alcohol.

We shall not here discuss the value of alcohol in medicine. We only assert, without fear of successful contradiction, that the general use of such a poison as a medicine is no longer held by the Medical Profession. If its use is thought advisable in certain cases, then the physician, and he only, should so order. To state this truth in another way, we would say it should not be necessary for you to be obliged to take alcohol in order to obtain the full benefits of medicines indicated in your case.

The question of your taking alcohol yourself, or of giving an alcoholic stimulant to your children, no longer enters into the question of your using any of our family medicines.

In substituting glycerin for alcohol, we have not only removed an objectionable feature from our medicines, but we have substituted in its place a medicine which has in itself very high medicinal properties. In taking this stand we know we are far ahead of even the front ranks of manufacturing chemists. But we must lead all others. Such has always been our endeavor, and will continue to be so long as we remain in business.

☪ Let your doctor determine this alcohol question. If he thinks your case requires a stimulant, he will prescribe it. Put the whole responsibility upon him. We do not believe he will order it in one case in a hundred, if indeed he does in one in a thousand. But follow his directions, at any rate. Do just as he says.
